

Increase the connection timeout to the interface

Go to the `/etc/mmc/mmi.ini` file

Change the **sessiontimeout** value. (This is in seconds)

```
root@ath:/etc/mmc# cat mmc.ini
[global]
; RPC backend to use
backend = xmlrpc
; Not necessary to restart mmc-agent when changing this value
; PHP session timeout in seconds. Default is 7200 seconds (2 hours)
sessiontimeout = 7200
: HTTP basic authentication credentials to use for XMLRPC communication
```
