

Audit

Precise and centralized activity tracking: Medulla's **Audit** module centralizes all activities performed by users, IT teams, and machines to ensure full traceability in compliance with IT security and governance requirements.

Audit Module Features

Tracking of user and system tasks

- View **current or past tasks** performed by a user, a group, or the entire organization.
- View every **scheduled or executed action**, whether it's a deployment, an update, an installation, or a system operation.

Individual and Team Audits

- Access custom views:
 - **My Tasks**
 - **My team's tasks**
 - **Tasks for all users**
- Ideal for multi-administrator or shared management environments.

Convergence history

- View **scheduled convergences** (recurring or orchestrated tasks), by user or by group.
- Monitor **task status**, progress, the number of affected machines, and any errors.

Status dashboard

- Real-time display of **the audit platform's status** to ensure the availability of monitoring data.

To learn more or access advanced features, you can consult the supplementary documentation by clicking **Audit**
