

Backups

Protect your data without compromise: Medulla's Backup module ensures the protection of data on your workstations and servers. Thanks to efficient backup mechanisms and centralized monitoring, you can be confident that your data is secure and recoverable at any time.

Key Features

Smart Incremental Backup

- A full backup is performed only once.
- After that, only **modified data** is backed up, saving disk space and increasing speed.

Online & Offline Backups

- Backups can be performed to **remote servers** or **local storage media**.
- This ensures **double security**, even in the event of a network disconnection or hardware failure.

One-click restoration

- Restore a file, a folder, or a complete system image with ease.
- Ideal in case of accidental deletion or critical failure.

Monitoring and alerts

- Clear dashboard to view the status of backups.
- Automatic notifications in case of errors or failures.
- Detailed logs accessible at any time.

To learn more or access advanced features, you can consult the supplementary documentation by clicking **[Backup](#)**
