

Computers

The Computers module allows you to manage and monitor the machines in your IT fleet. It centralizes the inventory of computers, their configurations, and their compliance status, as well as alerts related to their proper functioning.

Key Features:

- **List all computers:** Displays a complete list of all machines registered in the system.
- **Groups: Allows you** to create, list, and organize groups of machines
- **[Network Wake-up](#):** Allows you to boot a set of machines.
- **Configure computers:** Allows you to modify settings or apply specific configurations to a machine.
- **View alerts:** Displays system alerts or machine errors (e.g., update issues, failed connections, etc.).
- **Search for a Computer:** Use filters to search by name, machine type, or status.
- **Check Compliance:** Ensures that machines meet configuration and update standards.

What can you find in the Computers interface?

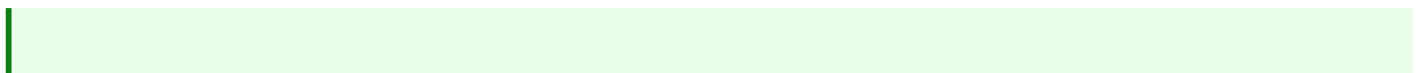

The interface displays:

- **Computer name**
- **Technical details** (model, operating system, etc.)
- **Latest applied configurations**
- **Machine status** (online, offline, error, etc.)
- **Related alerts**
- **Actions:** Edit, configure, or resolve alerts

Where can I find it?

The **Computers** module is accessible via the **main menu**, under the **Computers** tab.

- Click **Computers** to view the list.
- Use the filters to search for a specific machine, or add a new machine if necessary.

To learn more or access advanced features, you can consult the additional documentation by clicking **Computers**.
