

# History

Keep a record of every action: Medulla's History module allows you to view all actions performed within your infrastructure. It offers complete and accurate traceability, which is essential for diagnostics, auditing, and continuous improvement.

## Key Features

### View past actions

- View the history of operations on machines, configurations, deployments, connections, etc.
- Each entry details the time, user, machine involved, and action performed.

### Advanced filters and search

- Filter by **dates**, **log types**, **users**, or **machines** to quickly pinpoint a specific action.
- Ability to apply multiple criteria for detailed analysis.

### Historical reports

- Generate reports for a given period to understand system behavior or identify the source of a problem.
- Useful for auditing, compliance requests, or technical documentation.
