

Kiosk

Install applications independently, improve responsiveness, and reduce the workload on your IT teams with Kiosk: a Medulla module designed to allow users to install the applications they need themselves, without requiring administrative privileges.

Key features:

NOM DU PROFIL	ÉTAT DU PROFIL	ACTIONS
recetteqa	Actif	 

Application Catalog

- Applications are organized by category.
- Each user accesses a personalized catalog based on their profile or group.

Privilege-Free Installation

- Users can install or uninstall software without IT intervention.
- All installations are tracked and monitored from the Medulla console.

Managed updates

- Manual or automatic updates depending on the selected configuration.
- The administrator defines the versions to use to ensure compliance.

Centralized control

- Granular management of software access rights.
- Ability to restrict certain actions, such as uninstalling critical apps.
