

Administrator access

How to access the admin module?

You can access the admin module by clicking on the icon that represents a drive to the right of the menu or at the bottom of the menu bar always to the right by clicking on the "Click to go to expert mode" link.

What is the Administration module for?

The Administration module allows admin users to manage the Medulla system's advanced settings. It brings together the tools needed to configure the system and customize the application.
