

Organisation of the interface

A modular and intuitive medulla interface is based on a modular interface, where each feature is grouped by theme into an independent module. This allows for:

- Simplify daily use
- Quickly navigate to desired action
- Adapt the tool to your business need

Each module works as an application in the application, with its own views, filters, tabs, and settings.

Example of organization by module

Here are some concrete examples:

Computer Module

Main display:

List of computers with status (online/offline), user, last contact.

Tabs available:

Inventory, Actions, [LDCD](#), Backup, History.

Filters for use:

Operating system, groups, connectivity.

Groupes favoris
Tous les groupes
Ajouter un groupe
Liste des machines non-inventoriées
Alertes de monitoring
Configuration du monitoring
Action Rapide personnalisée
Résultats d'Actions Rapides

Additional Features:

- All computers / GLPI
- Favorite groups
- Non-inventory machines
- Monitoring alerts, configuration
- Quick action (personalised and results)
- XMPP view

Research:

By field, entity, with deletion options.

Example of a listed machine:

Nom de la Machine	Description	Système d'exploitation	Type	Dernier Utilisateur	Entité	Actions
 wva-win-1		Microsoft Windows 10 Pro	QEMU	user	Siveo Medulla
