

Manage rules

Rules allow you to automate certain network actions or behaviors.

RÈGLE	DESCRIPTION	NIVEAU	RÈGLES ASSOCIÉES	ACTIONS
orgADmach	Chooses ARS based on AD machines OUs	1	0	↓ 🔍 📄
orgADuser	Chooses ARS based on AD users OUs	2	0	↑ ↓ 🔍 📄
user	Chooses ARS based on user	3	0	↑ ↓ 🔍 📄
hostname	Chooses ARS based on hostname	4	0	↑ ↓ 🔍 📄
subnet	Chooses ARS in same subnet	5	0	↑ ↓ 🔍 📄
geoposition	Chooses ARS based on best location	6	0	↑ ↓ 🔍 📄
default	Use default ARS	7	0	↑ ↓ 🔍 📄
load balancer	Chooses the least used ARS	8	0	↑ ↓ 🔍 📄
networkaddress	Chooses ARS based on network address	9	0	↑ ↓ 🔍 📄
netmaskchoose	Chooses ARS based on netmask	10	0	↑ 🔍 📄

Why this is useful:

For example, this can trigger an automatic check or apply specific settings based on defined conditions.

Steps:

1. Click **“Rules”** in the menu.
2. On the page, you can:
 - **Change the priority order** of existing rules by clicking the down arrow to lower it

or the up arrow to raise it.

- **Add a new rule** as needed
- View the **details of a rule**

When you click the plus icon to add a new rule, the following form appears:

Admin

- Liste des relais
- Liste des clusters
- Nouveau cluster
- Liste des règles
- Gestion des entités
- Ajout d'un utilisateur
- Clients OIDC
- Nouveau client OIDC
- Journaux serveur

Relais

Sujet

Vérifier regex

Résultat correspondant

Valider

Fill in the fields one by one:

1. Select the rule
2. Select your relay
3. Describe the subject
4. Enter the regex to check
5. Validate

Even if you're not technically inclined, you can ask an administrator which rules are recommended for your environment.
