

Manage startup services

The screenshot shows a web interface for managing startup services. On the left is a sidebar menu with options like 'Gérer les services de démarrage', 'Menu de démarrage par défaut', 'Scripts de post-imaging', 'Liste des profils', 'Ajouter un profil', 'Configuration de l'imaging', 'Gestionnaire de fichiers de réponse sysprep', 'Tous les groupes d'imaging', and 'Ajouter un groupe d'imaging'. The main area is titled 'Gérer les services' and contains a table of 12 items. A search bar with 'Rechercher' is in the top right. The table has columns for 'Libellé', 'Description', 'Dans le menu de démarrage', and 'Actions'. The 'Dans le menu de démarrage' column shows green checkmarks for 'continue', 'backup', and 'poweroff'.

Libellé	Description	Dans le menu de démarrage	Actions
continue	Continue Usual Startup	✓	
register	Register as Medulla client		
backup	Create a Backup	✓	
diskless	Diskless Boot		
memtest	Memory Test		
dban	Shred Hard Drive		
hdt	Hardware Information		
reboot	Reboot		
poweroff	Power Off		

Boot services allow machines to boot an image from the network (via PXE, for example).

To configure

- Side menu **Manage boot services**

You can

- Enable or disable certain services
- Customize the boot process to suit your environment
