

Upgrading to major OS versions.

The update module in Medulla allows you to perform version updates directly from the Medulla interface via the Major Updates tab:

Mises à jour majeures

By clicking the Major Updates button, you will see the compliance view and view machines sorted by entity.

For each entity, you will see information ranging from Windows 10 versions up to the update from Windows 10 to Windows 11.

The screenshot shows the 'Mises à jour majeures' (Major Updates) section in the Medulla interface. It features a sidebar with navigation options and a main table displaying update statistics for three entities: Medulla, Avon, and Boulogne. The table includes columns for compliance rate, update counts for various Windows versions, and actions.

NOM DE L'ENTITÉ	TAUX DE CONFORMITÉ	MISE À JOUR W10->W10	MISE À JOUR W10->W11	MISE À JOUR W11->W11	A JOUR	MISE À JOUR NON CONSEILLÉE	TOTAL ORDINATEURS	ACTIONS
Medulla	0%	0	0	1	0	1	2	  
Avon	100%	0	0	0	0	0	0	  
Boulogne	100%	0	0	0	0	0	0	  

Among the information provided are the number of machines, updates from Windows 10 to Windows 10, and updates from Windows 10 to Windows 11.

Medulla includes Microsoft's prerequisites for upgrading to Windows 11.

In the image below, we can see that 4 machines do not meet Microsoft's requirements for upgrading to Windows 11.

This is a close-up of the table row for the 'Medulla' entity, showing the update counts and the 'ACTIONS' column.

Among the actions available on this page:

This icon allows you to deploy available major updates. If, as shown here, it is grayed out, this means that no machine requires an update or that no machine meets the conditions to receive an update.

Details per machine in the entity (this provides a history for each machine).

This action lists the machines that cannot be updated to Windows 11 until the prerequisites are met;

By clicking on the details per machine, you will see the following information:
